ADDRESS

English (fluent)

### **HOBBIES**

Passionate about opensource and security, I often help - financially or technically - companies like Mozilla, Proton, Wikipedia.

I also spend a lot of time helping linux communities on IRC or contributing to projects on GitHub.

Fascinated by Japan and its culture, I'm studying its language on my own to travel and visit the country later!

Amateur of music, I learned to play the piano, guitar, and drums. I also write my own songs.

## I WORK EXPERIENCE

MARCH 2019

### **FULL STACK DEVELOPER – CLEVY**

- Continuous development of their backoffice and chat app using Ember.js
- Conception and creation of a project to migrate from Ember.js to Vue.js using a new modular architecture
- RESTful API development with Node.js/Express

2018 (7 months)

#### **FULL STACK DEVELOPER - WIFIRST**

- Entire migration of a technical and statistical dashboard for their customers
  - 0 Conception and creation of a React/Redux single-page application
  - Conversion of the existing Ruby on Rails project to an API
  - UI/UX redesign of the dashboard
  - Integration of a multi-version angular application in the react app, and mobile-first rewrite of the entire CSS layer
  - Securing of the authentication system
- Optimization of the Vagrant development environment

2017 (4 months)

### WEB DEVELOPER - ADAPTI (INTERNSHIP)

- Front/Back development of their Symfony 2 product
- Server/System administration, rework of the server architecture to separate concerns (switch from a single domain to multiple sub domains)

2016 - 2017 (7 months)

### WEB DEVELOPER - 90TECH (INTERNSHIP)

- Entire redesign of the SOLITECH website, their first product
- Creation of an automated template generation tool for the websites of their upcoming products using Gulp and Slush

2015 (6 months)

## WEB DEVELOPER - MISS NUMERIQUE (INTERNSHIP)

- Conception and creation of an extranet for their suppliers, as a full-stack developer, using an in-house PHP framework
- Addition of static pages to their main website
- Continuous development of their cash payment interface for their first physical shop
